TIMBER FRAMING

Does not corrode

Australian coastlines are tough on buildings. Timber framing **won't rust**, making it a practical choice for coastal environments

WHY IT MATTERS

Building near the coast requires materials that can withstand the harsh conditions of salt-laden air.

TALKING POINTS

- Many Australian homes are built along the nation's coastal fringes
- Coastal environments increase corrosion risks
- Timber framing does not rust.
- Timber does not corrode.
