

CONVERSATION STARTER

TIMBER FRAMING

Renewable & sustainable

150 seconds is all it takes for Australia's plantations to regrow enough structural timber to frame an average house. That's why timber is **The Ultimate Renewable™**

WHY IT MATTERS

Timber comes from a renewable resource that can be regrown or replanted.

TALKING POINTS

- Structural timber is grown in managed plantations and forests.
- Harvested trees are replanted as part of a continuous cycle.
- Australia's plantations grow enough structural timber to frame an average house every 150 seconds.
- Using timber supports the ongoing cycle of growing, harvesting and replanting forests.
